

We supply the grain without the ring shown

850-010 SOLDEX® Soldering grain

This asbestos free soldering grain is ideal for fast and easy positioning of small articles to be soldered.

Just push the article into the grain and position it as needed, then remove the article after soldering. This soldering grain does not protect of heat.

The Solder Grain can be reused again and again.

With a push on the 'Clic-Clac' Box it opens and another push on the rim of the box and it is closed again.
